Portfolio: <https://sidd-sharma-portfolio.vercel.app/>

Professional Summary:

- **Lead Full Stack Developer** with 12+ years of experience designing and developing enterprise-grade REST APIs, cloud-native microservices, and distributed applications using C#, ASP.NET Core, Angular/React, Azure and SQL Server. Extensive experience modernizing legacy applications into scalable microservices, building secure APIs using OAuth2/JWT, Integrating Biztalk with APIs, containerizing applications, and deploying cloud solutions using Azure services and CI/CD pipelines. Strong background in application architecture, performance optimization, cloud migration, and technical leadership.
- Strong expertise in designing and optimizing high-performance, scalable platforms that improve developer productivity, enhance system reliability, and reduce operational costs. Proven success in cloud cost optimization and full-cycle software delivery across modern cloud, backend, frontend, and DevOps ecosystems (Azure, .NET, Angular, CI/CD, relational databases).
- Well-positioned for Senior Lead / Principal / Staff Engineer roles, recognized for strategic thinking, hands-on technical leadership, and a track record of delivering complex, high-impact initiatives that accelerate innovation and business value.

Skills:

- | | |
|--|--|
| • Programming Languages: | C#, TypeScript, JavaScript |
| • Web & Front-End: | Angular, ASP.NET MVC/Razor Pages, HTML, CSS, Bootstrap, OIDC, JWT, OAuth 2.0 |
| • Back-End & Frameworks: | .NET, .NET Core, ASP.NET, Web API, Microsoft BizTalk Server, Microservices, REST, CQRS, Entity Framework Core, MVC |
| • Cloud, DevOps & CI/CD: | MS Azure, Azure App Services, Azure Container Apps, Azure Functions, Blob Storage, Key Vault, Azure app insights, Azure DevOps (CI/CD), Docker, Kubernetes |
| • Database: | SQL Server, T-SQL, PostgreSQL, MongoDB |
| • Testing, Security & Code Quality: | OAuth, OIDC, JWT, APIM, NUnit, MSTest, Swagger, Orchestration Debugger, SonarQube, Veracode, PGP |
| • Development Tools: | Visual Studio, VS Code, Biztalk Server Administrator, GitHub, Postman, SoapUI, SSMS |
| • Enterprise & Legacy: | VB6, VB.NET, BizTalk, WCF, WPF, WinForms, jQuery, AJAX |
| • Domain: | Insurance, Re-Insurance, Title Insurance, Banking |

Trainings & Certifications:

- | | |
|---|----------------------------|
| • Microsoft Certified Professional | • GitHub Copilot Certified |
| • Microservices & Event Driven Architecture | • Azure DevOps |

Work Experience:

Team Lead / Lead Software Developer

Infosys Limited, Canada:

Jan 2023– Present

Key Responsibilities:

- Leading development of a **cloud native** Property Search Portal (**Angular, .NET8, Azure SQL Server, Bilingual, AODA compliant**) enabling the client to launch a new commercial title insurance offering for law firms across Canada, with an estimated **20% - 30% increase in commercial closing volumes**.
- Designed and built a **virtual document-signing** workflow (**Angular/.NET Core**), integrating the client's legacy application with a third-party e-signature and verification vendor — **eliminating manual signing** and cutting deal **processing time from 7 days to 3 days**, accelerating revenue recognition.
- Modernized legacy **.NET WCF services** into cloud-native **microservices (.NET Core)** on **Azure Container Apps**, streamlining deployment and auto-scaling across clusters; instrumented **Azure Application Insights** for proactive diagnostics, **reducing incident detection and resolution by 60%**.
- Leading a distributed offshore team of 7 (developers, QA, and support engineers), across sprint planning, code reviews, and technical mentorship to ensure consistent delivery quality (using **DAST, SAST and SonarQube**) and adherence to architectural standards.
- Re-engineered the Screening Web Form submission, through **caching** and **optimizing SQL Server** stored procedures, **reducing the processing time from 58 seconds to under 7 seconds**.

Technology Analyst

Infosys Limited, Canada:

Jan 2020 - Dec 2022

Key Responsibilities:

- **Collaborated with Product Owners** to define requirements, design solutions, lead development and testing, and support UAT to meet business objectives.
- Implemented **PGP encryption** for secure B2B document transfers by configuring **BizTalk Send Ports, custom Send Pipelines, and PGP encoder components**, ensuring secure, compliant, and reliable file exchange with external partners.
- Managed full project lifecycle, including sprint planning, team leadership, production deployments, and ensured code quality and security by conducting scans using SonarQube and Veracode.
- Identified a key workflow challenge in onboarding brokers within existing lender portals for an insurance client. Proposed and designed a dedicated Broker Portal to streamline the process, presenting a functional prototype and workflow analysis. Acted as the lead developer for the solution, **implementing Angular-based UI and .NET Core microservices**. The portal was successfully delivered and is now live, improving broker onboarding efficiency and user experience.

Technology Analyst, Senior, Software Engineer

Infosys Limited, India:

Jul 2014 – Dec 2019

Key Responsibilities:

- Led the offshore development team and worked with client architects to design and document target architecture. Delivered multiple portals using **.NET (WCF, WPF, Angular, Entity Framework)**, managed SQL Server objects, and supported production through issue resolution and patch deployments.
- Collaborated with the integration team to upgrade **BizTalk Server 2010 to BizTalk Server 2016**, resolving .NET Framework and dependency issues, **remediating XSLT maps, custom functoids, pipelines, and orchestrations**, executing regression testing, and ensuring reliable message processing and business continuity throughout migration.
- Identified repetitive manual tasks and developed a custom automation tool using **ASP.NET MVC and SQL Server stored procedures** to streamline the process. Client approved the tool, resulting in **30–35% increase in productivity**.

Education, Awards & Achievements:

- **Bachelor's Degree (First Class with Distinction)**, Hindustan University, India.
- **Awards:** Insurance Hi-Flyer award, INSTA and Appreciation awards at Infosys for quality and delivery excellence.
- **Impact:** Built in-house **Automation tools** and **AI Agents** (Angular, .NET Core, N8N) that eliminated manual tasks, reduced operational effort and costs, and improved delivery speed and client satisfaction.
